

D S N Shashikant

Full Stack + AI Engineer

Email: saishashikant4@gmail.com • Phone: +91 81097 10677 • Portfolio • linkedin.com/in/shashikant987 • github.com/SaiShashikant

SUMMARY

Full Stack + AI Engineer with strong production experience building scalable AI product platforms and high-density enterprise web applications. Proven track record architecting multi-model LLM agents, real-time WebSocket communication pipelines (NestJS, Redis), and enterprise frontend systems for manufacturing procurement and finance workflows.

EXPERIENCE

Full Stack + AI Engineer

Oct 2020 – Present

Kovaad Technologies Private Limited • Full-Time • Delhi, India

- Orchestrated full-lifecycle platform architecture from early MVP to production, driving system design across frontend, backend, real-time systems, and GCP cloud infrastructure.
- Engineered real-time chat infrastructure using NestJS and Socket.IO with Redis-backed state recovery, enabling live multi-client sessions with zero message loss.
- Orchestrated multi-model agent workflows (Gemini, OpenAI, Anthropic) via LangChain and Pinecone vector search (RAG) over session context for continuous guided interaction.
- Integrated real-time streaming speech-to-text (Google STT and Whisper/OpenAI) and TTS pipelines into the interactive session loop.
- Architected role-based dashboards (Admin, Center Head, Instructor, Observer) using Next.js App Router with optimized responsive layouts and real-time UX.
- Deployed containerized microservices using Docker, Kong API Gateway, and GCP Cloud Run with automated CI/CD pipelines via GitHub Actions.
- Implemented secure authentication and monetization infrastructure leveraging Firebase Auth/ACL and Razorpay automated B2B/B2C recurring subscription flows.

Frontend Developer (Freelance / Contract)

Jan 2026 – Aug 2026

Vindago Innovations LLP • Remote (Project: SEG-PACE)

- Delivered core frontend architecture for SEG-PACE, an enterprise platform streamlining manufacturing procurement, sales pricing, and financial reporting.
- Built complete cost-breakdown lifecycle flows, including raw material purchase programs and procurement price premise workflows, multi-versioning, approval state machines, and real-time foreign-exchange and raw-material autosave calculations.
- Engineered the sales pricing workspace supporting multi-tab currency and material conversions and master data updates across business units and customer-part links.
- Implemented high-volume finance data screens for profitability analysis, financial accounting, and net-sales reporting, with bidirectional Excel upload and download.
- Designed a high-density enterprise UI using React, TypeScript, Vite, MUI, TanStack Query, Jotai state management, and CASL for granular role-based access control.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), Python, SQL, HTML5/CSS3
Frontend	React, Next.js (App Router), Vite, Material UI (MUI), Tailwind CSS, TanStack Query, Jotai, CASL
Backend	NestJS, Node.js, RESTful APIs, Socket.IO, Redis, PostgreSQL, Kong API Gateway, Microservices
AI & Cloud	LangChain, Pinecone Vector DB, Gemini / OpenAI / Anthropic APIs, Google STT, Whisper, GCP (Cloud Run, Pub/Sub, Firestore), Docker, GitHub Actions, Firebase, Razorpay

EDUCATION

B.Tech in Mechatronics Engineering – CSVTU (CSIT)

2016 – 2020
